Rew. Robertson, W.P.

A CIA Louse-Up That Would Be Really Cosmic

tains information of value to version. Russia, China or any other: potential enemy on the globe report - the minutes of a easy, we wonder why. ought to be kept in the classi- meeting of "eminent" scien- An intensive hour of con-American would agree.

in possession of the CIA/ and owes all of its importance that panic can't break through. which did not contain information today to what has been edited. And what is the mystery? It consists of nothing other than plicit in the law governing the silent as the Sphinx. But what that instantly raises questions. CIA, or any other department ever it is, it must be pretty hot? of the Government, regardless; of whether it is explicitly stated

But while this set of conditions regarding documents applies to matters involving potential enemies on the globe. does it apply and should it f apply to potential enemies that[are off the globe such as the little green men, blue gnats, or whatever, they are that go termed Flying Saucers or Unidentified Flying Objects?

The question is much more better than a decade. important that at first it may seem to be.
